

## WINE CELLAR

### CHAMPAGNE

*Based upon 3 grapes, Chardonnay, Pinot Noir and Pinot Meunier, Champagne has many styles and is a very cool region producing wines with excellent acidity based upon the blending of different vineyards and grapes. Champagne styles vary based upon sweetness of the wine, the blend of the grapes used and the length of aging the final blend receives.*

### SPARKLING WINE

#### METHODE CHAMPENOISE

*The more general “sparkling wine” label can be very broad in meaning. The wines listed below are all by the traditional “methode champenoise”, the same process by which true champagnes are produced. These sparklers, however, are produced outside the Champagne region of France, and thus are given the more general label. Wines produced in this style from outside Champagne can be excellent values and represent some wonderful styles and locations.*

## FRENCH RED WINE BORDEAUX

*For generations, great red wine has meant Bordeaux. Unlike Burgundy, where a single grape is transformed into a wonderful wine, Bordeaux reds can be made from a blend of Cabernet Sauvignon, Merlot, Cabernet Franc, Malbec and Petite Verdot, allowing the blend to change from vintage to vintage as weather and climate dictate. The results can be amazing and have stood the test of time.*

## BURGUNDY

*Steeped in history and with a vineyard ownership situation more fragmented than any other area of France, Burgundy can be a confusing wine region to learn about. One thing is certain, however; nowhere else in the world does the Pinot Noir grape achieve the success that it does in Burgundy. Due to the vast amount of landowners and growers present in Burgundy, the producer has become an extremely important clue as to the quality of a particular wine.*
